Simplify network management with Grid Manager

Grid Manager is your comprehensive tool for managing and optimizing your entire MultiNode network. With its intuitive interface, you can easily provision MultiNode network, allowing for quick and easy setup. It supports updating firmware across all MultiNode devices seamlessly and in a centralized manner, ensuring your network is up-do-date with minimal effort.

Beyond just one network, Grid Manager enables you to mange multiple MultiNode networks. Understand how your network performs with indicators and, when your network grows, efficiently extend it by adding more nodes. With Grid Manager managing complex networks has never been easier or more efficient.
